

in which the cover layer is permanently embedded into the body layer from the roughly textured face to a depth less than the thickness dimension.

Claim 6. (Amended) The composite of claim 1 in which the thickness dimension is in the range of about 0.01 to 1 mm.

Claim 7. (Twice amended) The composite of claim 6 in which the thickness dimension of the cover layer has a variation of at most 1 mm.

Claim 8. (Amended) The composite of claim 6 in which the cover layer extends into the body layer to a distance from the roughly textured face at most about 95% of the thickness dimension.

Claim 30. (Twice amended) The composite of claim 1 which consists of

(a) a body layer consisting essentially of glass fibers defining a face of the body layer, and

(b) a cover layer embedded into the face of the body layer, the cover layer consisting of a solid substance having a thickness dimension, in which the thickness dimension is substantially uniform throughout the cover layer and in which composite the cover layer penetrates into the body layer to a distance of less than the thickness dimension of the cover layer.

Claim 33. (Amended) The composite of claim 30 in which the thickness dimension of the cover layer at any location on the composite differs from the thickness dimension of the cover layer at all other locations on the composite by at most about 1 mm.
